

MERLIJN

MULDER

STUDENT MSC AI

I am a persistent, enthusiastic, and ambitious student interested in technology and innovation, and enjoy working on interdisciplinary machine learning related projects within academic contexts.

I have a good communicative and results-oriented view, which I have used in multi-cultural environments.

Currently, I'm pursuing a master's degree in artificial intelligence, specializing in AI engineering, Machine Learning and Hybrid Intelligence.

EDUCATION

2025 - Present
UNIVERSITY OF GRONINGEN

- MSc Artificial Intelligence

2024
SINGAPORE UNIVERSITY OF
TECHNOLOGY AND DESIGN

- Minor including: functional programming, blockchain, UI Design & Extended Reality
- Awarded the NL Scholarship

2022 - 2025
UNIVERSITY OF GRONINGEN

- BSc Artificial Intelligence

LANGUAGES

- Dutch (Native)
- English (C1 level - TOEFL tested)
- German (B2 Level)

SKILLS

- Presenting/public speaking
- Active Listening
- Teamwork
- OOP-style programming & documentation
- **Tools:** LaTeX, VS code, WSL, SSH, pip (venv), Docker, MLFlow
- **Secondary code Stack:** Regex, huggingface transformers, pandas, FastAPI, PostgreSQL

PROJECTS & PAPER

Here I introduce two of my recent projects. More projects can be found on my [website](#).

OOD in MI-BCI

Paper

Machine learning models make predictions based on patterns learned during training, but can fail when faced with unfamiliar data. This issue is underexplored in deep learning models for Brain-Computer Interfaces (BCIs). I conducted a study using various uncertainty quantification methods to assess the current state of the art and the difference with other domains.

ADD Classifier

Development of an architectural design decision (ADD) classifier using a small debertaV3 backbone (44M parameters). Development was done in a dockerized fashion with a full CI/CD pipeline.

WORK EXPERIENCE

(Head) Teaching Assistant & Mentor

2023 - 2026

University of Groningen | Groningen, The Netherlands

- As Head TA for the courses Introduction to Artificial Intelligence and Autonomous System, apart from facilitating tutorials, I support the professors in the development of the courses. Furthermore, I have been a TA for various other courses within my degrees.
- As a mentor, I help first-year students transfer from high school to university. This includes group and individual sessions one semester long.

Committee Chair & Advisory Member

2023 - 2026

Study Association Cover | Groningen, The Netherlands

- I have been active as an advisory member for the symposium and sports committee within the study association. Previously I was chairman for both committees. Tasks included keeping an overview, meetings with external individuals and general work regarding the org event.

Sales & Solutions Employee

2022 - 2024

Mediamarkt Sontplein | Groningen, The Netherlands

- As a part-time sales and solutions employee, I advised customers on the technology products and services offered within the store's computer department to help them find the best-fitting solution for their problems.
